

Joom

Sesi Pengenalan & Praktikal Pembangunan Web Joomla 3

M.Hafeez

30 - 31 Oktober 2023
(Isnin – Selasa)

Apakah Content Management System (CMS)

- CMS ialah aplikasi web yang digunakan untuk mencipta, menyimpan, mengurus dan menggunakan kandungan laman web seperti teks, gambar, video dan bermacam lagi.
- Tidak perlu kepada pengetahuan mendalam dalam Markup Language (HTML) dan Programming Language (PHP)
- Memudahkan pengurusan kandungan laman web
- Contoh CMS: Joomla, Wordpress dan Drupal

Asas Pengenalan Struktur Joomla

- Terbahagi kepada 2 bahagian, **Front-End** dan **Back-End**
- **Front-End** => paparan yang akan diakses dan dilihat oleh pengguna
- **Back-End** => paparan yang akan diakses oleh pentadbir untuk mengurus kandungan web
- **Front-End** dan **Back-End**, terdiri daripada Template, Component, Modules dan Plugin.
- **Template** => mengawal keseluruhan reka letak dan persembahan visual kandungan dikenali sebagai *positions*
- **Extension (Component, Modules dan Plugin)** => Komponen yang menyediakan fungsi utama web Joomla

Keperluan Perisian Untuk Menggunakan Joomla

- Fail aplikasi joomla, download di <https://www.joomla.org>
- Web Server (Apache/Nginx + PHP)
- Pengkalan data (MySQL/mariadb)
- Gunakan pakej web server ,xampp untuk tujuan pembangunan (<https://xampp.org>)
- Pakej web server (xampp,wamp, dan lain-lain) tidak sesuai untuk kegunaan *public access*, hanya semata untuk tujuan pembangunan sahaja.

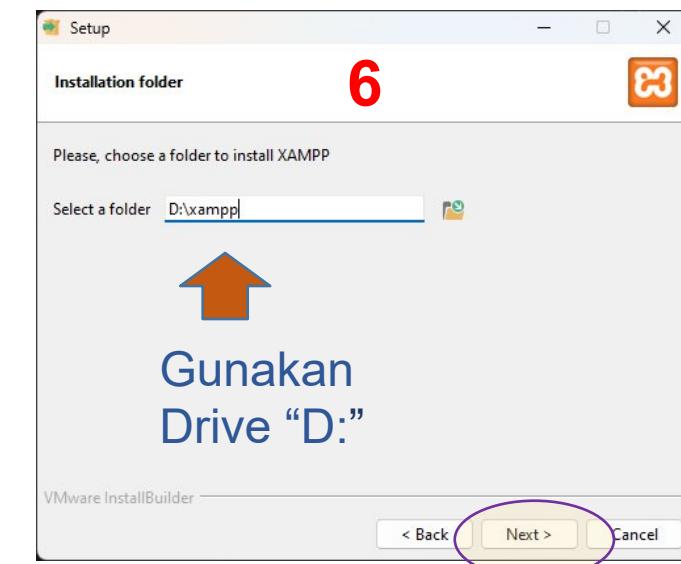

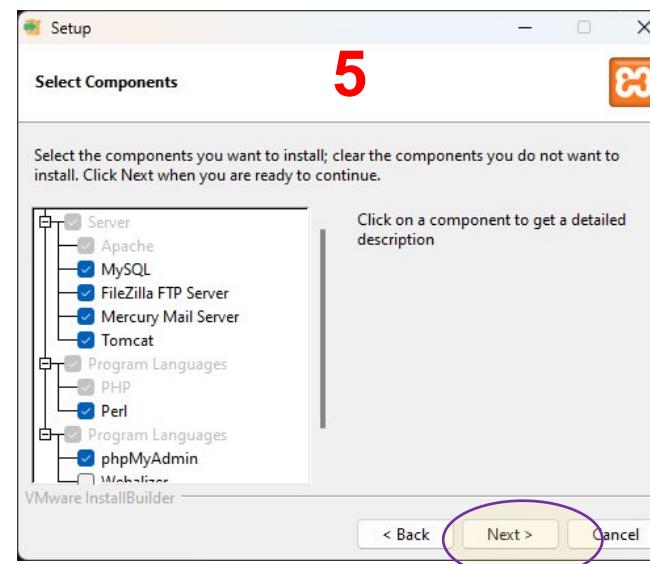

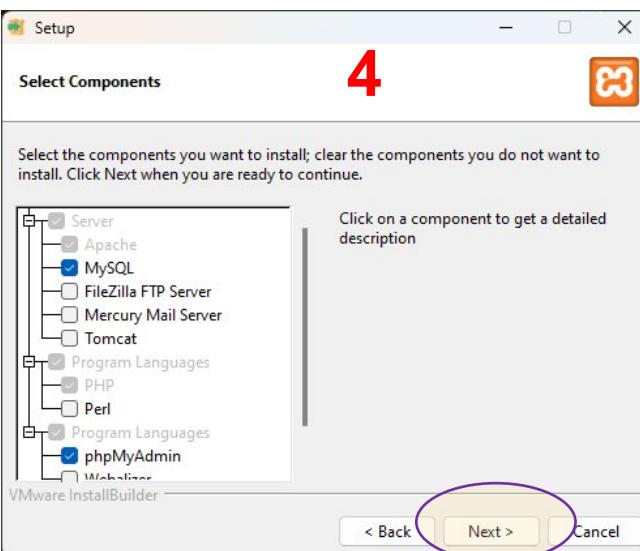

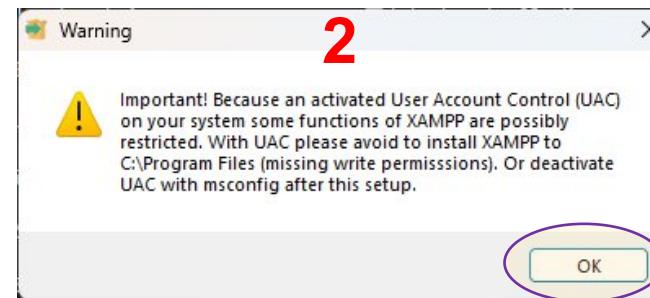

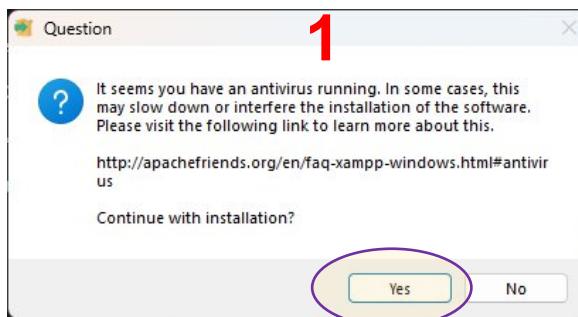

Pemasangan Pakej Web Server

- Muat turun fail joomla <https://www.joomla.org>
- Muat turun fail xampp (<https://xampp.org>)

untuk kegunaan dalam kelas boleh muat turun di
<https://tinyurl.com/joomlapenang>

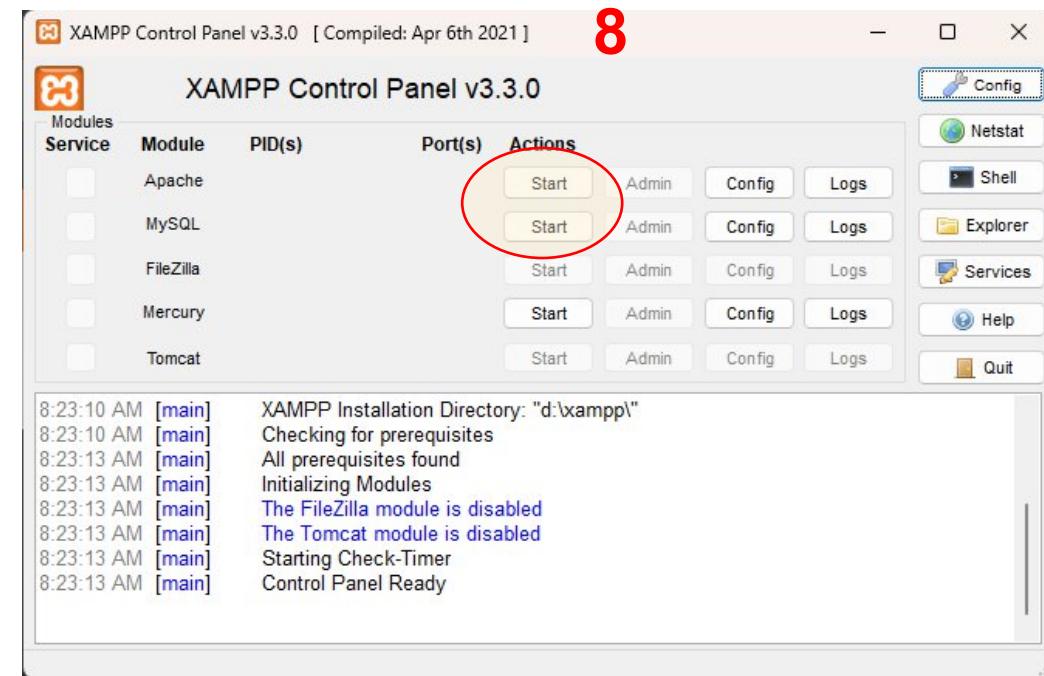

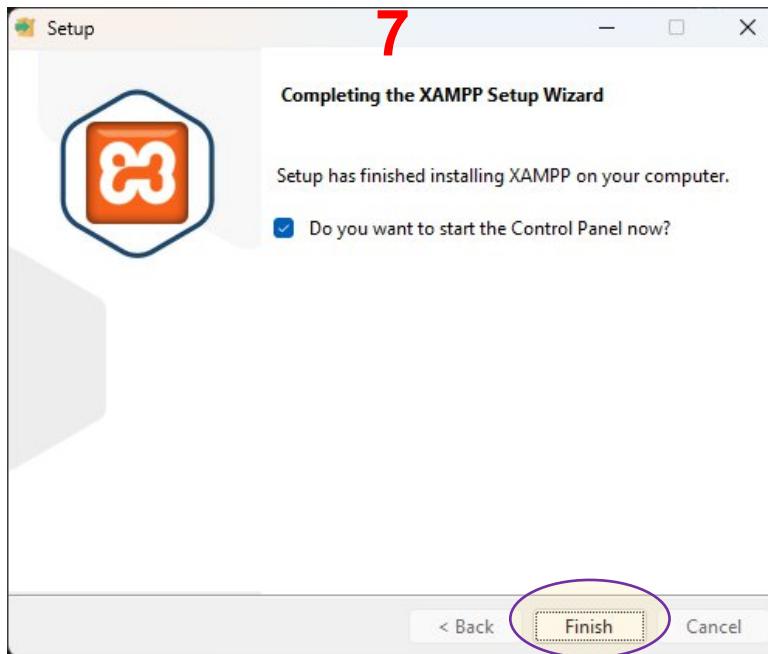

Pemasangan Pakej Web Server

Installasi Xampp Web Server

Pemasangan Pakej Web Server

Installasi Xampp Web Server - Tamat

klik start pada “Apache” dan “MySQL”

Langkah Pemasangan Joomla

- Extract fail Zip Joomla 3.10 yang telah didownload kedalam D:\xampp\htdocs (lokasi xampp semasa installasi)
- Cipta pengkalan data menggunakan PHPMYADMIN
 - Buka Browser (Edge, Chrome) dan ke URL <http://localhost/phpmyadmin>
 - klik “New” -> taip nama pengkalan data dalam kotak “Database Name” dan klik “Create”
- Taip pada url : http://localhost/<folder_joomla_extracted> (nama folder joomla yang telah di *extract* tadi.

Langkah Pemasangan Joomla

 Joomla!

Joomla! is free software released under the [GNU General Public License](#).

1 Configuration 2 Database 3 Overview

Pre-Installation Check

If any of these items are not supported (marked as **No**) then please take actions to correct them.
You can't install Joomla! until your setup meets the requirements below.

PHP Version >= 5.3.10	Yes
Magic Quotes GPC Off	Yes
Register Globals Off	Yes
Zlib Compression Support	Yes
XML Support	Yes
Database Support: (mysqli, pdo, pdomysql, sqlite)	Yes
MB Language is Default	Yes
MB String Overload Off	Yes
INI Parser Support	Yes
JSON Support	Yes
configuration.php Writeable	Yes

Recommended settings:

These settings are recommended for PHP to ensure full compatibility with Joomla.
However, Joomla! will still operate if your settings do not quite match the recommended configuration.

Directive	Recommended	Actual
Safe Mode	Off	Off
Display Errors	Off	On
File Uploads	On	On
Magic Quotes Runtime	Off	Off
Output Buffering	Off	Off
Session Auto Start	Off	Off
Native ZIP support	On	Off

Langkah Pemasangan Joomla

 Joomla!

Joomla! is free software released under the [GNU General Public License](#).

Congratulations! Joomla! is now installed.

Joomla! in your own language and/or automatic basic native multilingual site creation

Before removing the "installation" folder you can install extra languages. If you want to add extra languages to your Joomla! application select the following button.

[→ Extra steps: Install languages](#)

Note: you will need internet access for Joomla! to download and install the new languages.
Some server configurations won't allow Joomla! to install the languages. If this is your case, don't worry, you will be able to install them later using the Joomla! Administrator.

PLEASE REMEMBER TO COMPLETELY REMOVE THE INSTALLATION FOLDER.
You will not be able to proceed beyond this point until the "installation" folder has been removed. This is a security feature of Joomla!

Joomla Administrator - “Articles”

paparan “New Article”

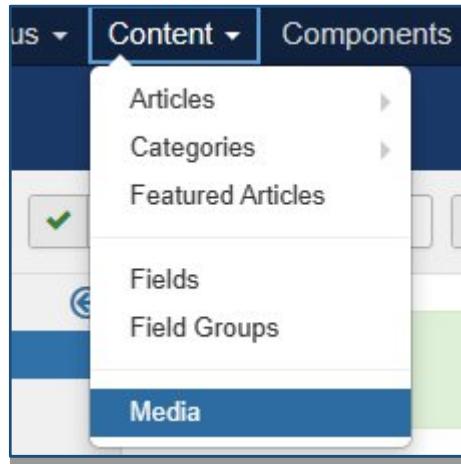

Pastikan “Category” dipilih mengikut draf yang telah dibuat

The screenshot shows the Joomla 'Articles: New' editor interface. At the top, there are four buttons: 'Save' (green), 'Save & Close' (light green), 'Save & New' (blue), and 'Cancel' (red). Below these are fields for 'Title' (containing 'Introduction') and 'Alias' (set to 'Auto-generate from title'). A navigation bar includes tabs for 'Content', 'Images and Links', 'Options', 'Publishing', 'Configure Edit Screen', and 'Permissions'. The main content area features a rich text editor toolbar with various formatting options like bold, italic, underline, and tables. The content itself is a block of text about Prime Coffee. To the right, a sidebar contains sections for 'Status' (set to 'Published'), 'Category' (with 'Main Contents' selected), 'Language' (set to 'All'), 'Tags' (a search field), and 'Note' (an empty text area). A large blue arrow points downwards from the text 'Pastikan “Category” dipilih mengikut draf yang telah dibuat' towards the 'Category' dropdown menu.

Joomla Administrator - Media (Muat Naik Gambar)

Menu :
Content > Media

A screenshot of the Joomla Media Manager. The top bar has 'Media' selected. It includes buttons for 'Upload', 'Create New Folder', and 'Delete'. Below is a list of 'Media Folders': banners, headers, sampledata, fruitshop, parks, animals, and landscape. On the right, there's a file upload area with a large blue arrow pointing up. It shows an 'Upload file' input field with 'Choose Files' and 'No file chosen', a 'Maximum upload size: 10.00 MB' limit, and a 'Start Upload' button. Below the upload area are three folder icons labeled 'banners', 'headers', and 'sampledata'. A blue arrow points from the 'Media Folders' list towards the upload area, and another blue arrow points from the upload area towards the folder icons.

Joomla Administrator - Menus

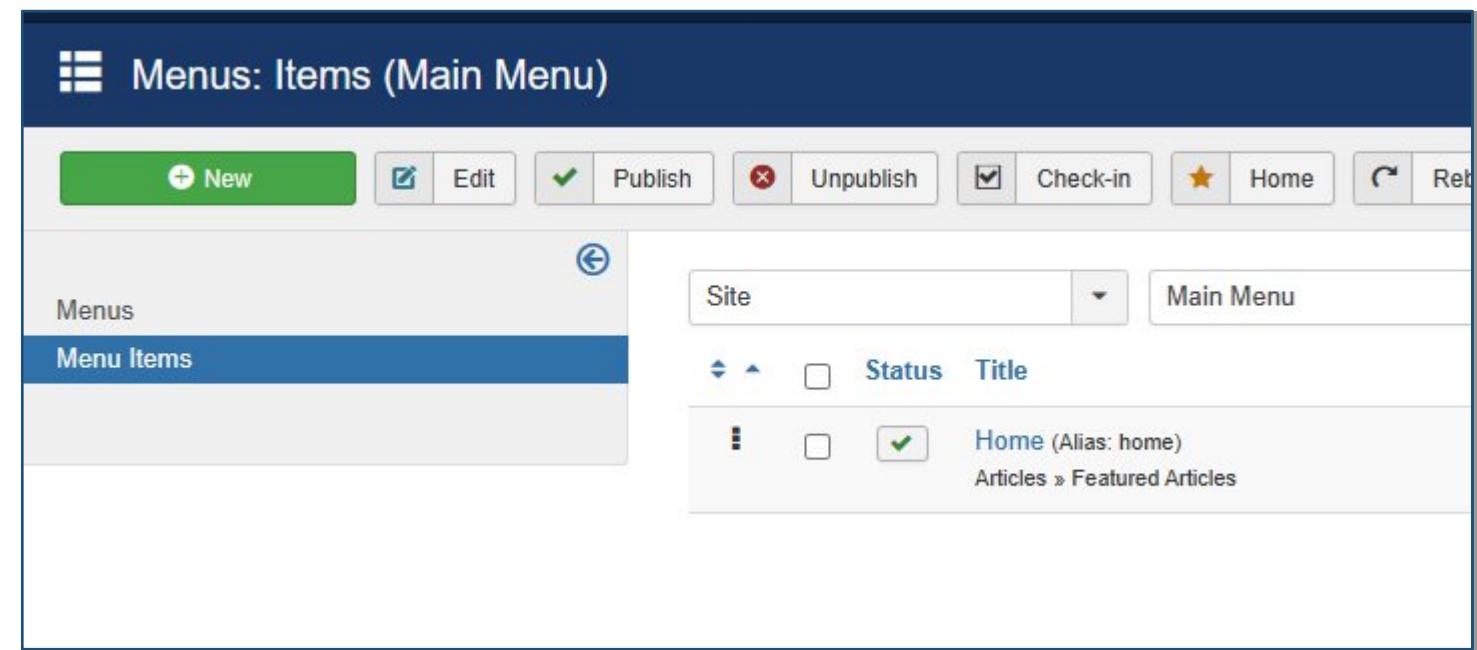

Menu :

Menus > Main Menu (default menu yang diberikan selepas setup joomla)

Menu :

New -> cipta menu baru

The screenshot shows the Joomla administrator interface for managing menus. The top navigation bar has 'Content' selected. A sub-menu is open under 'Menus' with options: 'Manage', 'All Menu Items', 'Site', and 'Main Menu'. The 'Main Menu' option is highlighted. The main content area is titled 'Menus: Items (Main Menu)'. It features a toolbar with buttons for 'New', 'Edit', 'Publish', 'Unpublish', 'Check-in', 'Home', and 'Reb'. On the left, there's a sidebar with 'Menus' and 'Menu Items' sections. The main panel displays a table with one row for the 'Home' menu item. The table columns are 'Status' (checkbox), 'Title' (text field containing 'Home (Alias: home)'), and 'Articles » Featured Articles' (link). The status column for the 'Home' item has a checked checkbox.

Joomla Administrator - Templates - pemasangan

Menu :
Extensions > Manage > Install

Pilih tab “Upload Packge File”

Browse file, dan pilih
fail: ***ja_start_template_2.0.4.zip***

selepas itu ulang langkah sama dan install
t4_system-plugin_2.3.3.zip

Nota:
pemasangan templates, dan extension
(componen,module,plugin) adalah sama.

Joomla Administrator - Templates

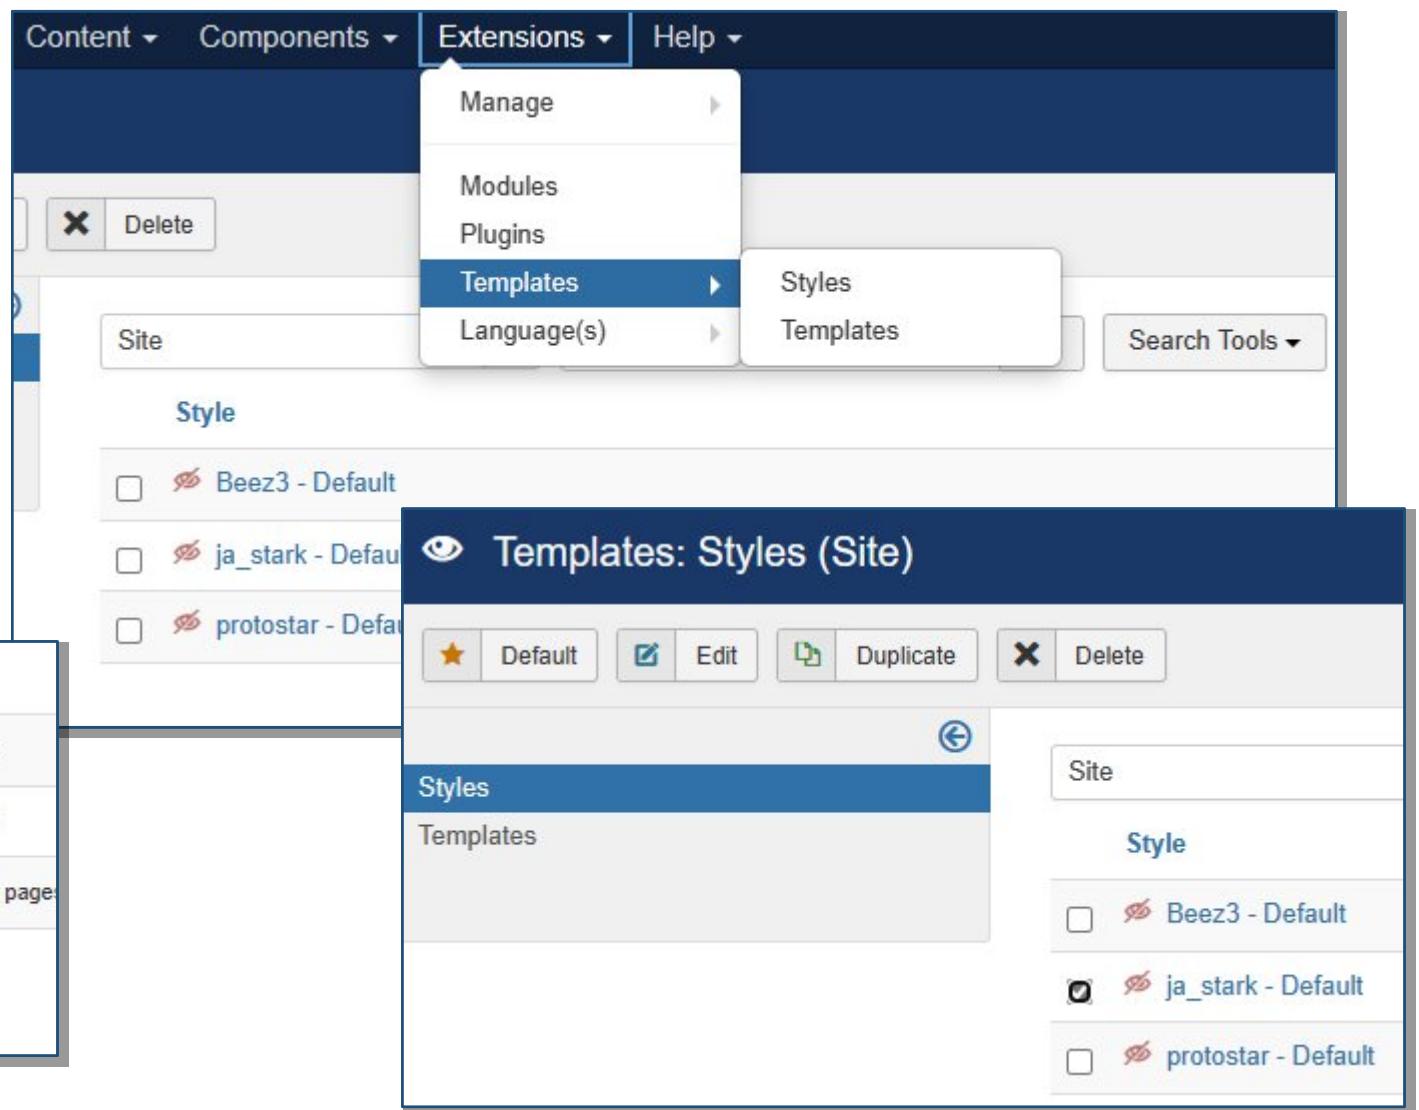

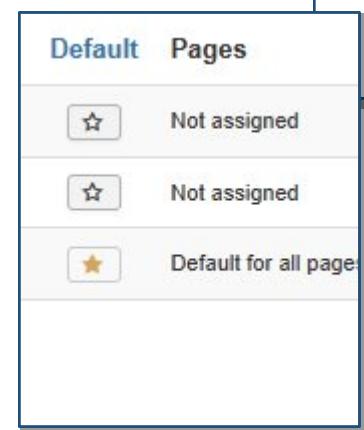

Pemilihan templates

Menu :
Extensions > Templates > Styles

Pilih template yang dikehendaki
dan klik butang star

atau

tick checkbox templates dan
klik butang “Default”

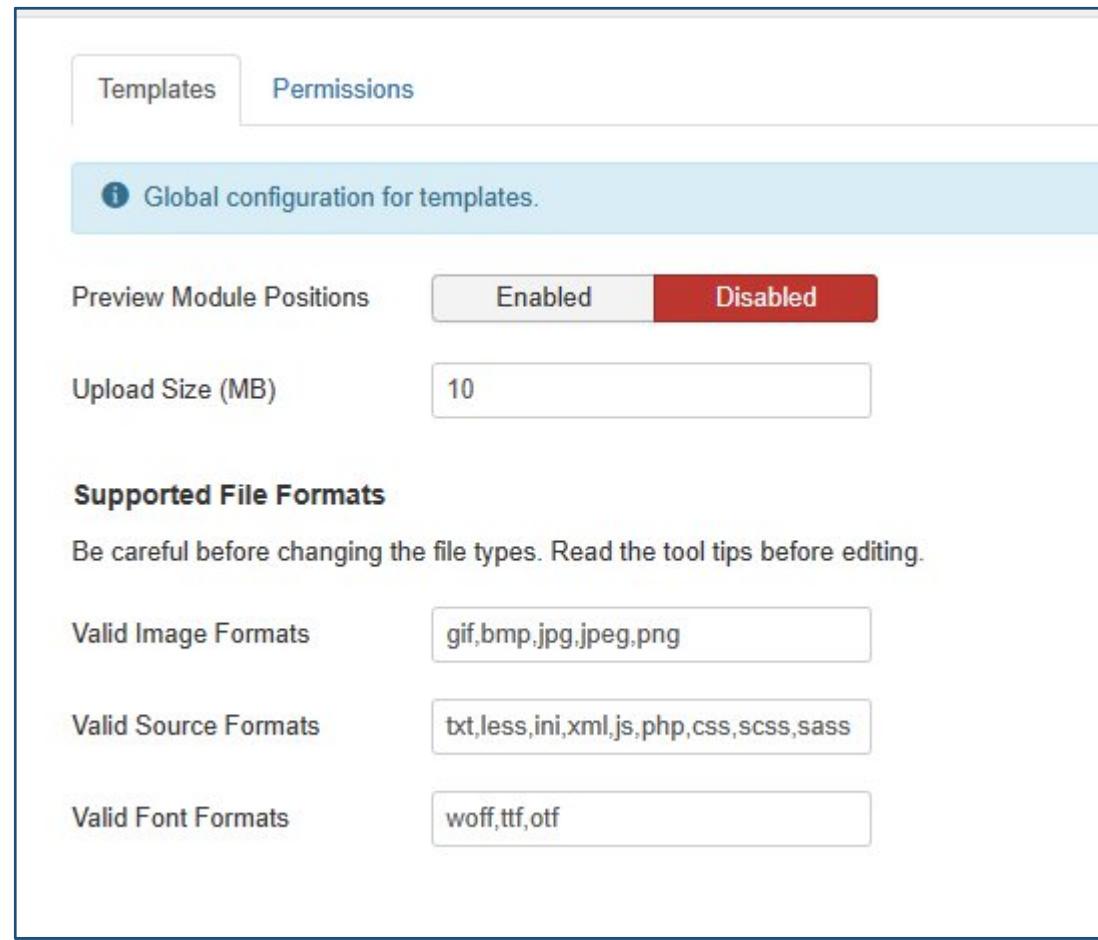

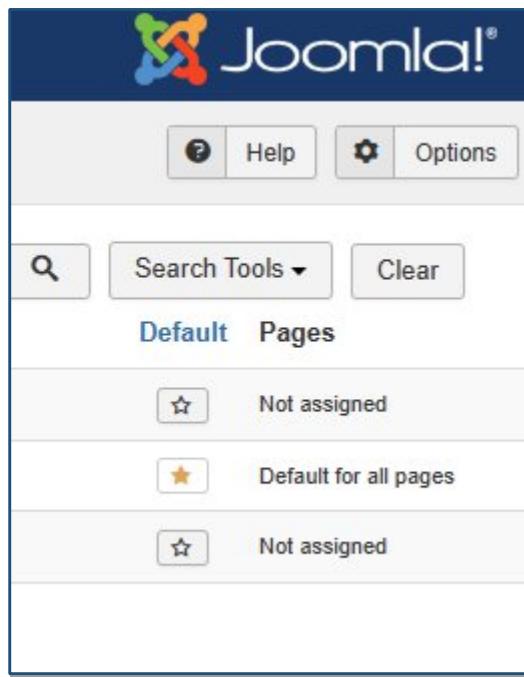

The screenshot shows the Joomla administrator's top navigation bar with the 'Extensions' menu item highlighted. A dropdown menu from 'Extensions' includes 'Manage', 'Modules', 'Plugins', 'Templates' (which is also highlighted), and 'Language(s)'. Below this, the 'Styles' configuration screen is displayed. The title is 'Templates: Styles (Site)'. It shows a list of styles: 'Beez3 - Default' (unchecked), 'ja_stark - Default' (checked and marked with a yellow star), and 'protostar - Default' (unchecked). At the bottom, there are buttons for 'Default', 'Edit', 'Duplicate', and 'Delete'. On the left, a sidebar lists 'Site' and 'Style'. The main content area shows the 'Styles' section with the 'ja_stark - Default' style selected.

Joomla Administrator - Templates - Position

Papar “position” pada template

Menu :

Klik pada butang kanan atas “Options”

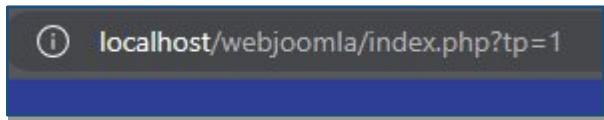

This screenshot shows the 'Templates' configuration page in the Joomla administrator. The 'Position' tab is selected. A message at the top says 'Global configuration for templates.' There are two buttons for 'Preview Module Positions': 'Enabled' (which is greyed out) and 'Disabled' (which is red). Below that is a 'Upload Size (MB)' input field set to '10'. A section titled 'Supported File Formats' contains three input fields: 'Valid Image Formats' (containing 'gif,bmp,jpg,jpeg,png'), 'Valid Source Formats' (containing 'txt,less,ini,xml,js,php,css,scss,sass'), and 'Valid Font Formats' (containing 'woff,ttf,otf').

Klik butang “Enabled” pada Preview Module Positions

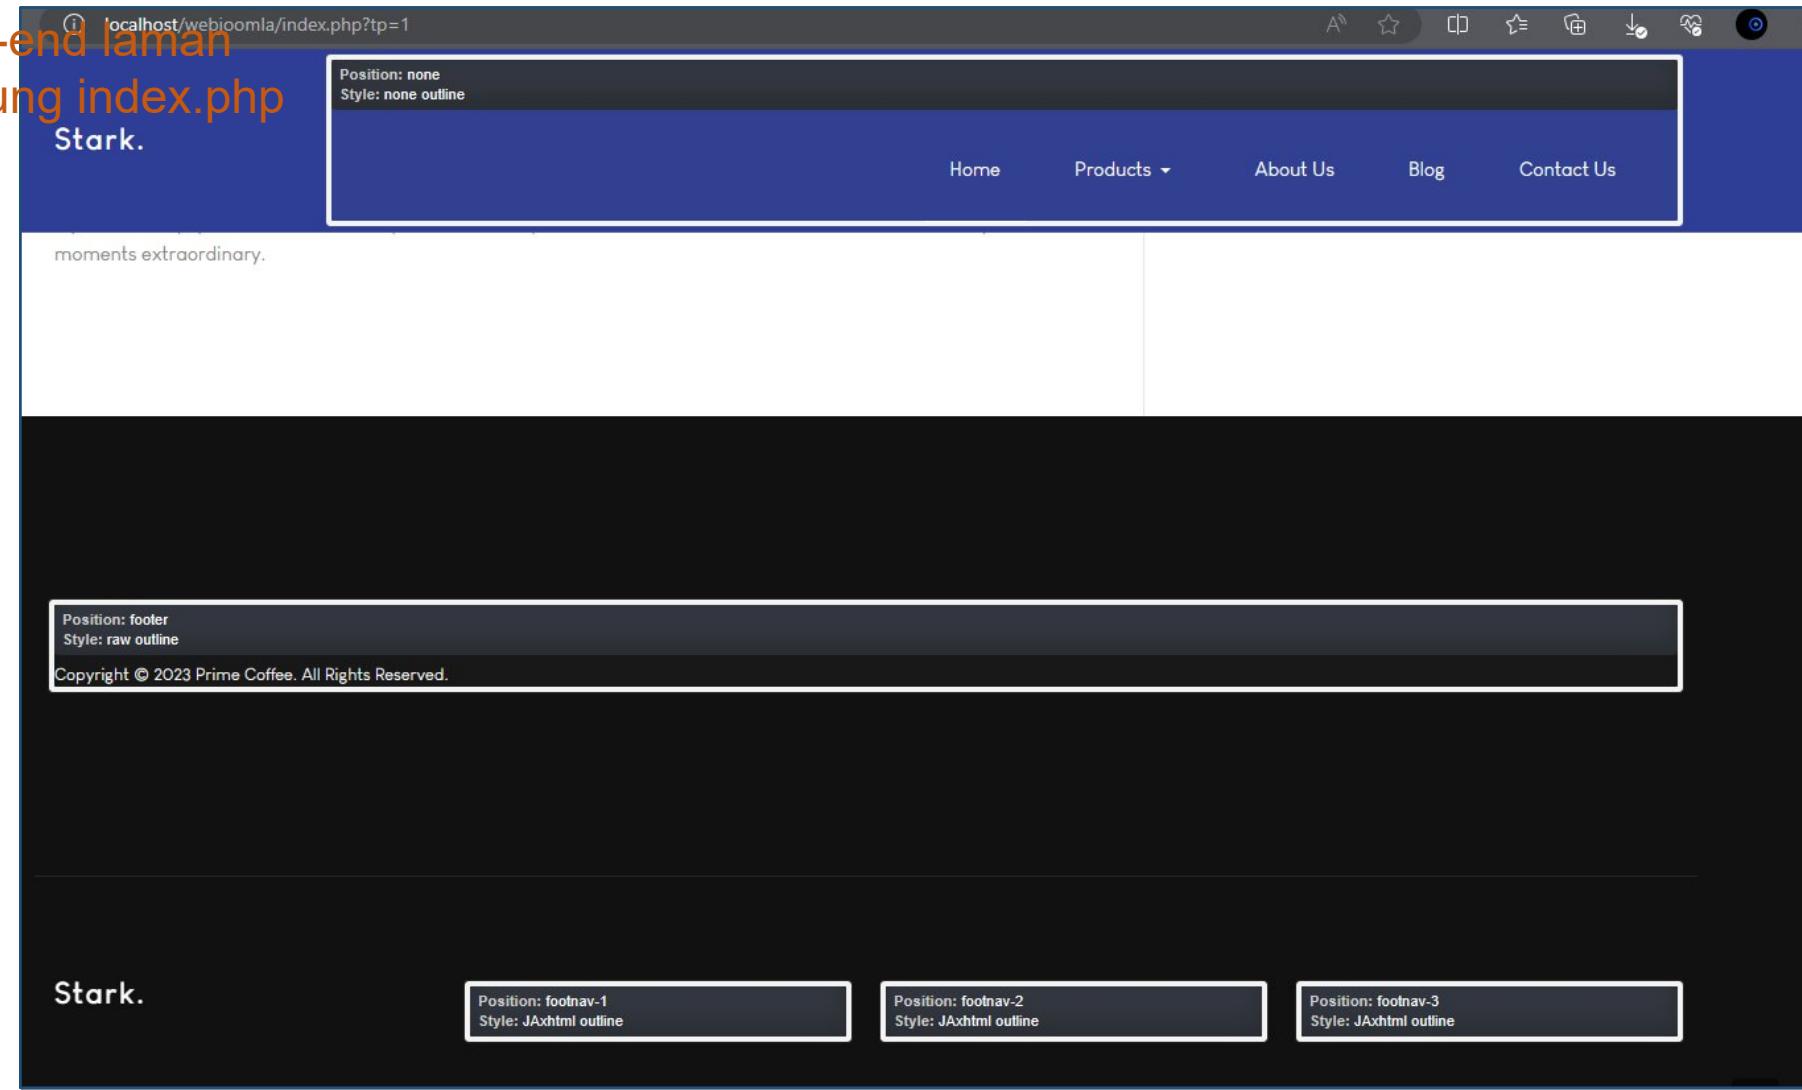

Joomla Administrator - Templates - Position

Pada URL browser, buka front-end laman web dan tambah “?tp=1” diujung index.php

front-end akan paparkan nama **position** untuk memudahkan pembangun meletakan **module (extension)** pada paparan nanti.

Cth: *Module image slider*
